WordPress Is Easy to Use and Powerful

But hosting your WordPress site the right way requires time and expertise. Let us handle that so you can get back to running your business. Your competitors have already put old-fashioned WordPress hosting behind them. They've moved to managed hosting and said goodbye to:

Slow load times

Time-outs

A site offline all weekend

White screens of death

Caching issues

Plugin update or compatibility issues

Waiting hours or days for tech support
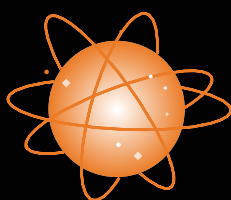

Getting hacked or DDoS attacked

Save Hours of Work and Hundreds of Dollars Every Month

Optimize your admin tasks, resources, and budget with our enterprise-level tools. Get premium features at no extra cost in every plan.

Highest-End CPUs & Global Availability

We offer exclusively the highest-end CPUs and global availability thanks to Google's C2 machines on the Premium Tier network. Our clients are seeing performance improvementsfrom 30% all the way up to 200%!

Global Content Delivery Network

Take advantage of 275+ locations worldwide to deliver blazing-fast pages and serve your cached assets from your website visitors' closest location.
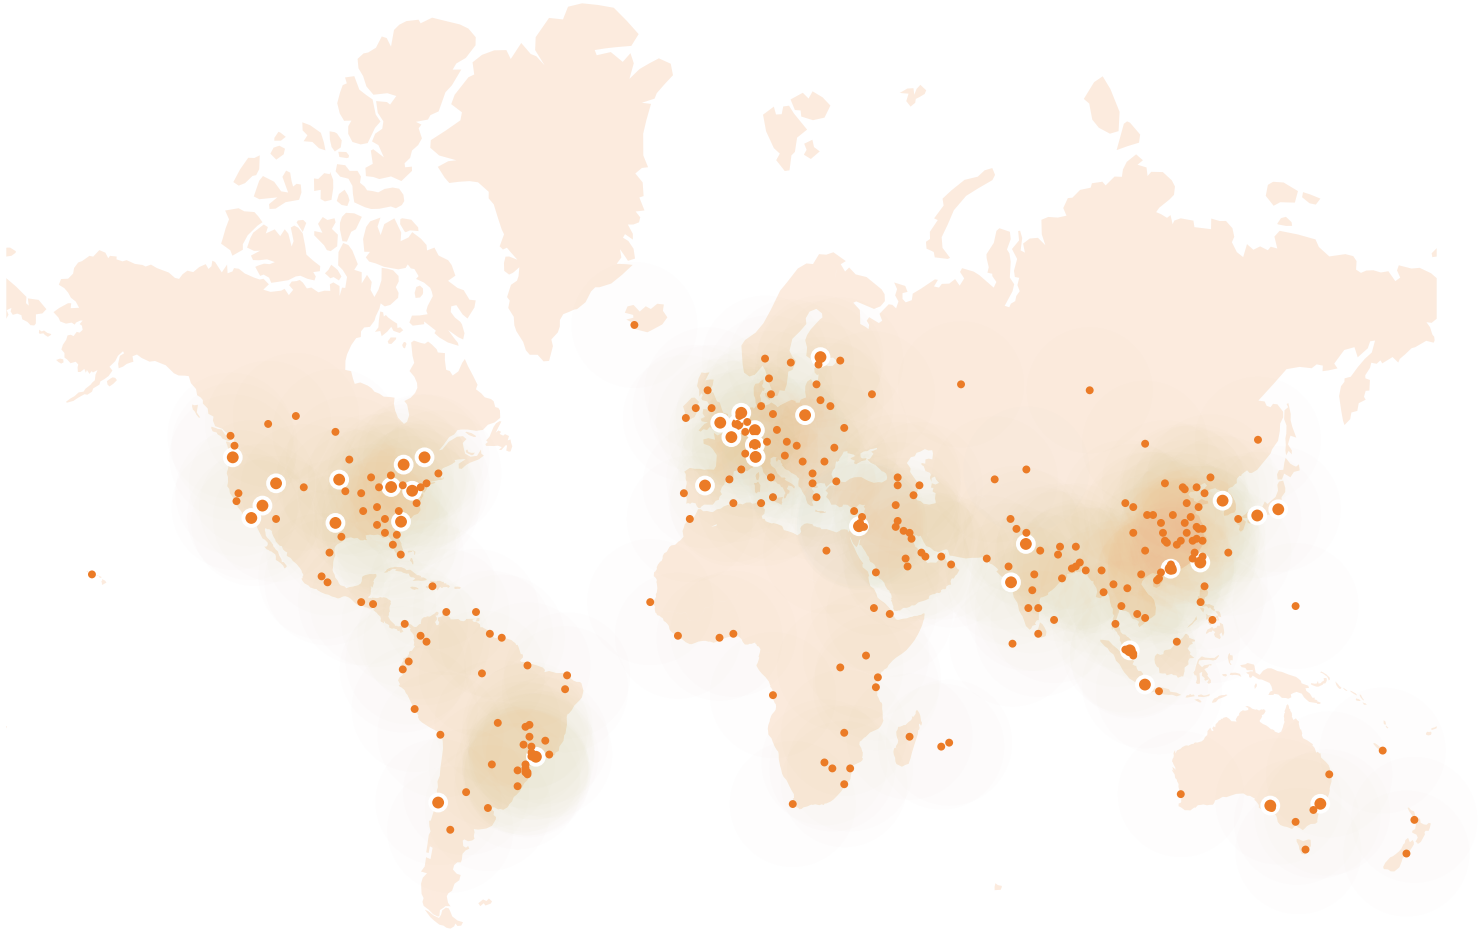

Built-In Application Performance Monitoring

Built-In Application Performance Monitoring Identify the performance issues slowing your site down with our APM, our custom-designed performance monitoring tool for WordPress sites. Available on all plans!

- Las Vegas, Nevada, USA

Faster, More Secure Websites at No Additional Cost

We provide Cloudflare Enterprise on all its plans for free. **Save $200/month per site!**

> **Enterprise-Level Firewall and DDoS Protection**
>
> Detect and block DDoS attacks (or any malicious event) immediately thanks to our free Cloudflare integration with IP-based and firewall protection.

> **Faster Page Delivery for All Your Users**
>
> Powered by Cloudflare's global edge network, our CDN securely serves static and dynamic content from 275+ cities so your content loads quickly around the world.

> **HTTP/3 Support Right Out of the Box**
>
> HTTP/3 is the next evolution of the HTTP protocol with significant improvements for performance, security, and reliability. All sites hosted by us fully support HTTP/3 so you don't need to waste time tweaking your server settings.

> **Simplified SSL Management With Free Wildcard SSL Support**
>
> Take advantage of wildcard SSLs and easily secure your root domains with an unlimited number of subdomains thanks to our Cloudflare integration.

> **Edge Caching**
>
> As part of our Cloudflare integration, Edge Caching saves your site/page cache to any of Cloudflare's global network of 275+ data centers. Edge Caching is included free with all our plans, doesn't require a separate plugin, and cuts the time needed to serve cached WordPress HTML by an average of more than 50%!

Speed Things Up Automatically With Our FREE CDN Network

Included at no extra cost is our powerful Content Delivery Network (CDN). A CDN serves up large files like images from a fast server located close to your site visitor.

Our CDN results in up to **44% faster page loads!** Plus, it comes with:

> HTTP/3 support

> One-click set-up
